

This is our website, generally we want to make it an online traditional Chinese medicine hospital (网上中医院)。

We want to make this website fully functional by the end of Nov.

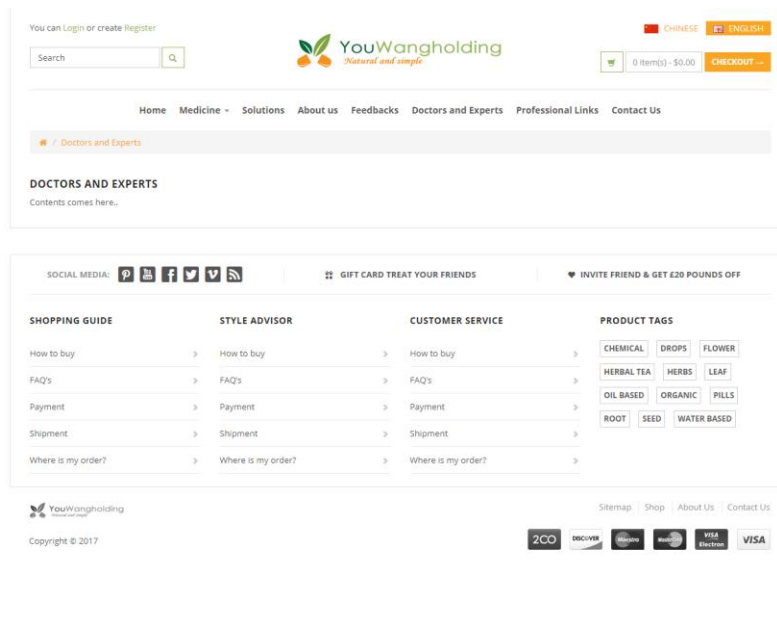

Generally the work is in good progress, however, the previous engineer encountered some problems to continue. Thus I will briefly explain all the work we need to do later.

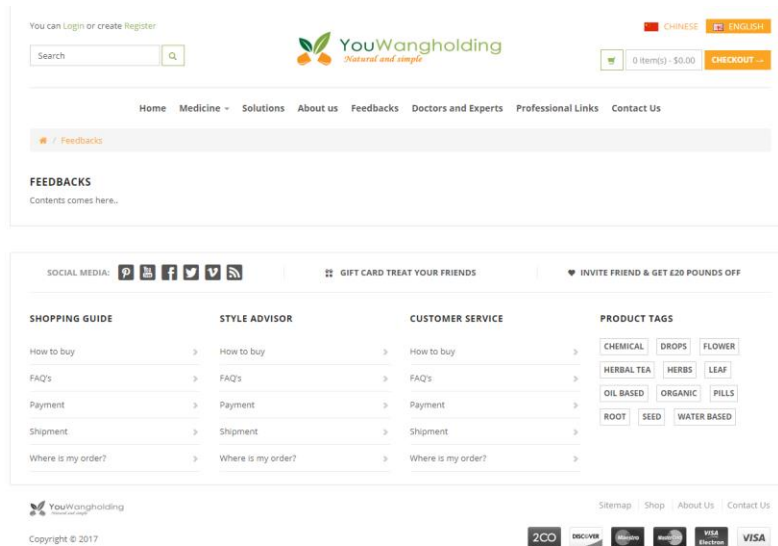

This is our product page, generally it looks okay, but on the Chinese page there is still some English. We need to change them, our company will provide translation.

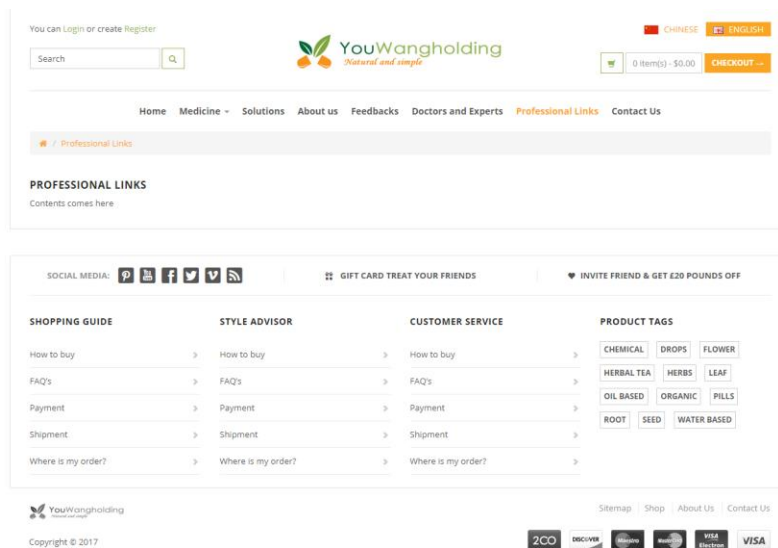

This is our solution page, on this page we want to provide customers with medical solutions and allow them to buy medicines accordingly, we would like to make it look like the product page, as in, we can add different solutions and indicate prices, customers can click purchase button and we can receive the order accordingly.

This is doctor page which is also currently blank, we want customers can view doctors' profiles and make appointments online, which will let us receive the appointment at administrator page, also similar with products.

This is feedback page, we want to make this page like a posting forum, customers can post their feedbacks here, and we can manage them accordingly.

We want to change this page to partners, and provide different page for different type of users (need login) details are as follow:

Partners:

We want to categories for partners, linked to two pages:

Page 1:

Doctors (for Eng)/ 医师(for Chn)

This page is a page that user can find a big chart which we list all our products there and they can type the order for each one, and submit the entire order.

Product1	Price1	Number for user to type in
Product2	Price2	Number for user to type in
Product3	Price3	Number for user to type in
Product4	Price4	Number for user to type in
Product5	Price5	Number for user to type in
Product6	Price6	Number for user to type in
Product7	Price7	Number for user to type in
...

Auto calculate total price include tax here

Confirm purchase button

We don't want everybody view this, so we want only some designated members of the website can view it, and they need to log in.

Page 2:

Other Partners (for Eng)/其他合作伙伴(For Chn)

On this page we need to type in some words and also a text box for users to send us messages.

Contact Us:

We want to add google map address on the previous contact us.
